of Technology

# Features of the Alliance

Promoting in-depth collaboration across education, research and innovation

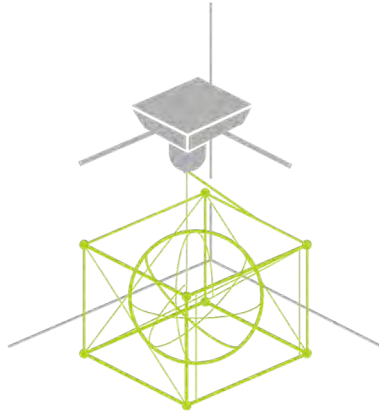

Maximising mutual collaboration through EU funding opportunities

Providing high quality input to policy, bringing technical solutions to society

# Focus Areas

Additive  
Manufacturing

Entrepreneurship  
& Innovation

Health &  
Bioengineering

Sustainable  
Society

Artificial Intelligence  
for Engineering Systems

# Focus Area: AI for Engineering Systems

Co-lead

## EuroTechPostdoc2 Programme

70 Marie Skłodowska-Curie fellowships for a 24-month period to experienced high-potential researchers.

# EuroTechPostdoc2 programme

- Budget ca. €2.7 million, duration 5 years: 2021-2025
- All fellows did their PhD studies abroad
- Freedom for researchers to establish their own research projects (bottom-up)
- International experience at two EuroTech universities
- **By now:**
  - **10 fellows finished the programme**
  - **4 fellows resigned from the programme to continue their journeys in industry**
  - **6 fellows got a tenure track/permanent position in academia**

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement no. 899987.

# EuroTechPostdoc2 programme

Fellows moved to the EU from the following non-EU countries:

Albania – 1	Korea – 1
Australia – 2	Lebanon – 1
Brazil – 5	Mexico – 3
Canada – 2	Sudan – 1
China – 7	Switzerland – 2
India – 5	UK – 4
Israel – 3	USA - 3

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement no. 899987.

# Attracting and Retaining AI Talent

- In the EuroTechPostdoc2 programme, 11 out of 70 are AI researchers
- MSCA programmes are attractive for high-quality AI researchers of European and non-European origin
- Postdoctoral fellows and PhD candidates value being embedded into a European network
- AI is a very difficult market: it is challenging to keep AI researchers in academia
- There is a competition for AI talent among the EU member states. E.g. Humboldt Foundation attracts AI talent from other EU countries to Germany
- Universities struggle to fill in PhD positions and senior positions with AI researchers (8 months search period)
